

Recommended Curing Schedule

Hours	Dry Bulb Temp	Advance Rate	Wet Bulb
0-24	90°-100°	1°/HR	95°
24-48	100°-105°	1°/HR	102°
48-72	105°-120°	1°/HR	105°
72...	120°-165°	1°/HR	105° Lower Stalk 108° Upper Stalk

- Do NOT leave 120° Dry Bulb until the tobacco is yellow
- If you use curing gas, do so during 24-48 hour period
- This schedule is tested and proven, some variation may occur depending on your tobacco
- To attain proper Wet Bulb reading change wicks every cure
- Proper Wet Bulb reading is critical to maximize fuel efficiency
- Periodically check Wet Bulb accuracy with a hygrometer
